PISTON TYPE WATER HAMMER ARRESTERS

Maximum working pressure - Designed to keep residential, commercial and industrial water lines @ 350 p.s.i. maximum working pressure during pressure surges following quick valve closure. Working TEMPERATURE RANGE - From 33° to 250° F.

INSTALLATION

The piston unit can be installed in new construction or renovation/remodel It can be installed at any angle to accommodate structural limitations, and should be placed as close to the shut-off valve as possible, one on each hot and cold line. The piston unit is seamless, factory charged and is maintenance free and does not require access panels. It cannot be charged in the field. For optimum performance, install the piston unit in a vertical position.

TYPICAL INSTALLATIONS

· Properly sized and placed the piston unit can be set in a multiple fixture branch for commercial/institutional/industrial/residential applications.

PISTON UNITS Comply with the following: ASSE/ANSI 1010 Water Hammer Arrester Standard PDI WH-201 Water Hammer Arrester Standard
